SESSION 1 LAB EXPERIMENTS

1) First Palindromic String in an Array and find its complexity

- Time: O(N × L)
- Space: O(N × L)

2) Common Elements Between Two Arrays and find its completity

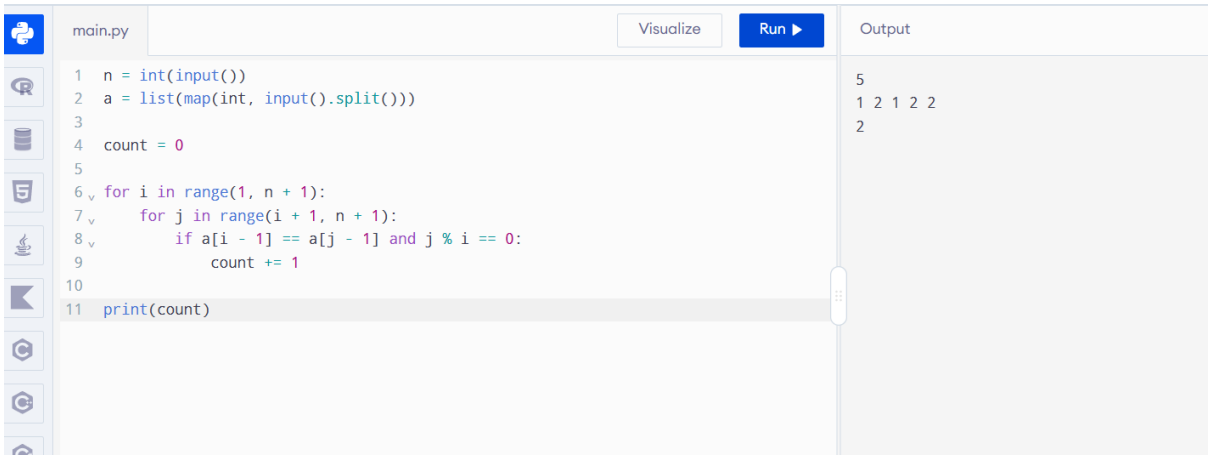

- Time Complexity: O(N × M)
- Space Complexity: O(K)

3) Subarrays Distinct Element Sum of Squares

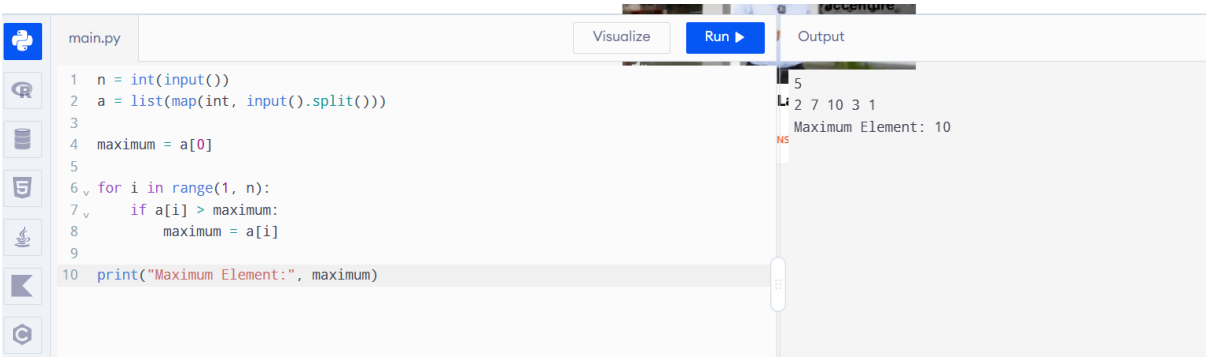

- Time Complexity: $O(N^3)$
- Space Complexity: $O(N)$

4) Count Equal and Divisible Pairs in an Array

- Time: $O(N^2)$
- Space: $O(1)$

5) Maximum Element with Least Time Complexity

- Time Complexity: O(N)
- Space Complexity: O(1)
